

NOT BAD FOR A CAR PARK

A live comedy show built entirely from real Google reviews — Bret Treasure

v1.0 · Sept 2026

THE SHOW

DURATION	45 minutes, no interval	FORM	Interactive comedy / comedic cabaret
CAST	One performer	ADVISORY	Coarse language and adult references. Recommended 15+
CREW	None — the show is self-operated	TOURING	One performer, one bag, no freight

SCHEDULE

BUMP IN	30 minutes	BUMP OUT	15 minutes
CHECK	15 minutes, sound and vision	HOUSE OPEN	15 minutes prior

STAGING

PLAYING AREA	Minimum 3m wide × 2m deep. Preferred 4m × 3m
RISER	300–600mm preferred. Floor level is fine where seating is raked or tiered
SURFACE	Any flat, non-slip surface — timber, vinyl, sealed concrete or carpet. No sprung floor, marley or dance surface required
CLEARANCE	Minimum 2.4m. 2.7m preferred
UPSTAGE	Clear wall or screen for projection
RIGGING	None. No flying, fly bar, truss or rigging points required

SOUND

PA	House system with even front-of-house coverage
MIC 1	One wired handheld (SM58 or equivalent) or headset — performer
MIC 2	One radio handheld, roving — for audience questions and audience-submitted reviews. Required for opening night, which closes with an artist's talk and audience Q&A. Desirable for all performances: the show invites the audience to read their own reviews aloud.
PLAYBACK	Stereo from performer's laptop — 3.5mm, USB or DI, whichever the venue prefers
MONITOR	Not required
OPERATION	Performer triggers playback from the laptop unless the venue prefers to run it

VISION

DISPLAY	Projector and screen, or a monitor 65" or larger
IMAGE SIZE	Minimum 2m wide
INPUT	HDMI from performer's laptop. Adapters supplied
POSITION	Ceiling mount or floor. Throw distance to suit the image size above
CONTENT	High-contrast text and screenshots. Tolerant of ambient light — full blackout is not required

LIGHTING

STATE 1	General warm wash on the playing area
STATE 2	House lights held at 20–30% throughout
SPECIALS	None
BLACKOUT	Not required at any point
NOTE	The show is interactive. The audience must stay visible — to the performer and to each other. A room that can only do full-up or blackout still works; a low house state is simply better

POWER & VENUE

POWER	Two 10-amp outlets at or near the playing area. All cabling taped or matted	SIGHTLINES	Wide and shallow beats deep and narrow. Ideally no seat more than 8m from the playing area
CAPACITY	50–200 seats	ACCESS	Step-free access to the playing area preferred
SEATING	Rows or cabaret seating — both work well	MERCH	A table for book sales if one is available

IF THE VENUE CAN ONLY PROVIDE ONE THING

A microphone and a screen. Everything else on this page is a preference, not a requirement — the show has been built to be easy to say yes to.
